

Hazard Communication – Hazardous Substance Training Guide

Instructions:

Ensure Employees have completed EHS-4300 Hazard Communication Training before completing local Tier III training outlined in this document.

Local (Tier III) Training Requirements

Per Cal/OSHA 8 CCR 5194, employees shall receive hazardous substance training in the following topics:

- Detection of presence or release;
- Physical and health hazards;
- Safety procedures;
- Labeling methods; and
- Location of Safety Data Sheets.

See next page for optional training template

Resources for Completing Hazardous Substance Training

- Manufacturer-provided Safety Data Sheet (SDS)
 - Alternative: msds.stanford.edu
- Locally-developed Standard Operating Procedures (SOPs)
- EH&S-published fact sheets on hazardous substances
 - Available at:
[https://ehs.stanford.edu/reference?f\[0\]=field_related_topics%3A969](https://ehs.stanford.edu/reference?f[0]=field_related_topics%3A969)
- EH&S Occupational Health and Safety Program, call 723-0448.

Where to Access Important Documents

SDS

Container Labels

Telephone

General Emergency Response

Consult references for first aid procedures and spill response specific to each substance. General first aid and spill response are outlined in the column to the right.

First Aid

Eye Contact:

- Flush eye with running water for 15 minutes
- Seek medical attention

Dermal Contact:

- Remove clothes from affected area
- Flush skin with running water for 15 minutes
- Seek medical attention

Inhalation:

- Remove victim from contaminated area
- Seek medical attention

Ingestion:

- Consult SDS for first aid
- Seek medical attention

Spill Response

Non Health-Threatening

Employees can clean up non health-threatening spills under the following conditions:

- Spill is <30mL, **and**
- You are knowledgeable of the substance's hazards, **and**
- You can clean it up with materials at hand, **and**
- Appropriate PPE is available and used during spill cleanup.

Health-Threatening

Immediately call EH&S (725-9999) if:

- Spill is not contained and might enter the environment, **or**
- Spill is >30mL, **or**
- Cleanup cannot be completed in 15 minutes.

Recordkeeping

Keep a record of all training for a minimum of one year.

Hazard Communication – Hazardous Substance Training Record

This form is a tool to help supervisors communicate the hazards, safety procedures, and labeling methods associated with a hazardous substance. Gather information from Safety Data Sheets (SDS) from the manufacturer, standard operating procedures (SOPs), or EH&S-published fact sheets to complete. Substances with similar properties may be grouped together. Review this form with employees as part of their Local (Tier III) job-specific Hazard Communication training.

1. Substance or Substance Class:

2. Detecting Presence/Release

Physical State

☐ Gas ☐ Liquid ☐ Solid

Color

Odor

Gas monitor/alarm ☐ Yes ☐ No

3. Tasks Used:

4. Physical Hazards:

☐ Corrosive ☐ Explosive ☐ Flammable

☐ Gas under Pressure ☐ Oxidizer ☐ Reactive

5. Routes of Exposure and Health Hazards:

☐ Inhalation

☐ Eye Contact

☐ Skin Contact

☐ Ingestion

6. Safety Procedures:

☐ Engineering Controls

☐ Safe Work Practices

☐ Personal Protective Equipment (PPE)

☐ Emergency Procedures
