

Office of Emergency Management Program Description

March 2025

Executive Summary

Universities nationwide are increasingly challenged by major emergencies and disasters, such as climate change-influenced extreme weather, utility disruptions, and violence. To address these challenges, Stanford has developed emergency management and mission continuity capabilities that align with its decentralized organizational structure.

Emergency management is the organizational function that creates the framework within which communities reduce vulnerability to hazards and create the capability to respond to and recover from disasters. The field has evolved significantly, driven by the growing frequency and complexity of disaster events and greater reliance on “brittle” lifeline infrastructure systems. At the same time, students, faculty, staff, and visitors expect greater and more responsive disaster-related services and support from their university community.

The Stanford University Office of Emergency Management (OEM) is located within the Department of Environmental Health & Safety, part of the University’s Office of the Vice Provost and Dean of Research. With a budget of \$800,000, the three full-time OEM staff members lead university-wide efforts to prepare the University for major emergencies and disasters and coordinate the response to such incidents. This summary outlines the current scope of responsibilities and programs administered by OEM.

Mission

The mission of the Stanford University Office of Emergency Management (OEM) is to lead university-wide efforts to protect life safety, safeguard infrastructure, maintain research and teaching, and communicate with the Stanford community during major emergencies or disasters. The OEM program works in support of four focus areas key to Stanford University’s overall Operational Resilience:

1. Dynamic Capacity - The ability to adapt and adjust resources, capabilities, or operations in response to changing circumstances.
2. Mission Continuity - The discipline to proactively plan for sustaining essential functions during crises, combined with the clarity of purpose to understand what is truly essential.
3. Shared Reality - The integration and information sharing required to align our understanding of the situation, anticipated future developments, and their significance within the broader context.
4. Unity of Effort - Aligning intentions and efforts, emphasizing the significance of a cohesive approach and shared objectives.

Lines of Business, Program Elements and Key Components

Lines of Business

OEM program activities and resources are oriented towards the delivery of capabilities and services for the University community along four primary lines of business:

1. Hazard Analysis and Planning
Identify and assess significant hazards/threats that could harm people, damage property/environment or disrupt University operations. Develop, coordinate, and maintain comprehensive enterprise-level emergency management plans, procedures, and planning tools. Assist University schools, departments, and business units with internal planning.
2. Disaster Direction and Coordination
Develop and maintain the capability for University leadership to direct, control, and coordinate University-wide response and recovery operations including 1) ability to make swift and informed decisions during emergencies, 2) capability to evaluate evolving circumstances in real time to inform response strategies, 3) proficiency in conveying concise instructions and rationale for actions, and 4) capacity to adapt plans and reallocate resources as needed. Monitor and respond to potential or actual major emergencies and disasters. Engage and lead/support the University's emergency management organization during initial response and ongoing recovery efforts. Develop and coordinate policies, operational plans, tools, and procedures including the University's Emergency Operations Center (EOC) and the CardinalShield platform.
3. Education, Training & Exercises
Develop and deliver disaster and mission continuity preparedness information/education to the entire University community. Assess, develop, and implement targeted training and educational programs for the University community, strategic functions, and emergency management organizations. Assess and evaluate emergency response plans and capabilities through regularly scheduled exercises. Take corrective steps as necessary.
4. Logistics, Facilities, and Communications
Develop procedures for the prompt and effective acquisition, distribution, and use of personnel and major equipment for essential emergency functions. Support development of reliable communications capabilities to alert University leadership and emergency response personnel, warn the University community, and effectively manage major incident response. Maintain the Emergency Operations Center (EOC).

The OEM program supports and coordinates enterprise-level emergency management functions for academic, research, and business operations at all Stanford properties, facilities, and locations, including the Stanford campus, Stanford Redwood City (SRWC), Hopkins Marine Station, Stanford Research Park (SRP), Stanford Campus Residential Leaseholders (SCRL), and Jasper Ridge Biological Preserve (JRBP), as well as satellite campuses and overseas locations.

In alignment with Stanford's de-centralized organizational structure, several schools and business units have developed internal emergency management programs and capabilities. Note: Stanford Health Care (SHC), Stanford Medicine Children's Health (SMCH), and The Stanford Linear Accelerator Laboratory (SLAC) independently administer their own emergency management programs.

Program Elements

The specific components of the OEM program align with the framework of the National Fire Protection Association (NFPA) 1660 Standard on Emergency, Continuity, and Crisis Management: Preparedness, Response, and Recovery. The order of the program elements does not necessarily represent their importance or priority.

OEM Program Elements:

1. Hazard Identification, Risk Assessment, and Mitigation
2. Planning
3. Direction, Control, and Coordination
4. Incident Management
5. Mission Continuity
6. Communications and Public Information
7. Education, Training, and Exercises
8. Logistics, Facilities, and Resource Management
9. Program Management, Improvement, and Governance

Key components for each element are detailed on the following pages.

Element One: Hazard Identification, Risk Assessment, and Mitigation

Identify situations or conditions that have the potential to harm people, damage property/environment, or disrupt University operations. Assess the likelihood, vulnerability, and magnitude of impact that could result from significant threats or hazards.

- University Enterprise Risk Management (ERM)
The Office of the Chief Risk Officer manages Stanford's Enterprise Risk Management (ERM) process. The ERM Office provides a framework and processes for identifying, assessing, mitigating, and monitoring risks to achieve the University's mission and goals. OEM supports the University's ERM program by leading and assisting efforts to address top enterprise risks including Climate Change, Earthquake, Cybersecurity, Infectious Disease Outbreak, Global Risk, and Mission (Business) Continuity.
- Emergency Operations Plan (EOP) - Hazards Analysis
Develop detailed and pragmatic summaries defining man-made, natural, and technological threats and hazards that may impact the University. Coordinate Stanford schools and organizations that perform or contribute to this effort. Review relevant infrastructure and demographic data.
- Hazard and Threat-specific Incidents (e.g. Electrical Outages)
Develop detailed threat analysis for emerging threats and forecast potential impacts. Serve as subject matter expert for atypical threats such as electrical outage, active threat, pandemic, or extreme extreme heat. Serve as an information resource for University jurisdictions.
- Homeland Security (Terrorism) Threat Assessment
Support ongoing review of terrorism threats to University schools, departments, business units and operations. Evaluate general and specific threats. Maintain staff Terrorism Liaison Officer (TLO) network connections and participate in regional networks related to Homeland Security threat intelligence (e.g. Silicon Valley Homeland Security Coordination Group). Represent the university in major regional security event planning (e.g. Super Bowl LX).
- Hazard Mitigation Planning
Although not serving as the University's lead agency, OEM is a crucial hub for information sharing, coordination, and collaboration among different university departments and stakeholders. Enable institutional leadership to effectively prioritize mitigation efforts by fostering strategic alignment around organizational resilience. Additionally, facilitate dialogue, encourage partnerships, and promote a culture of preparedness across the university.
- Operational Area Hazard Mitigation Plans
Assist in developing the consolidated Multi-Jurisdictional Hazard Mitigation Plans for the counties of Santa Clara and San Mateo. Participate as an active member of working groups, sub-committees, and workshops.

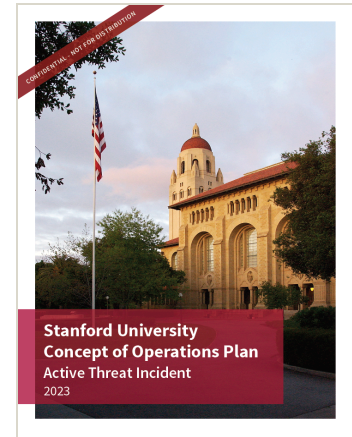

Not in scope:

- *OEM 24/7 Duty Officer*
- *OEM Terrorism Liaison Officer*
- *University-level Threat/Hazard Identification and Risk Assessment*
- *University-level Hazard Mitigation Plan*
- *Hazard mitigation program/project management or funding*
- *ProtectSU seismic bracing non-structural items project (ended 2023)*

Element Two: Planning

Develop, coordinate, and maintain comprehensive enterprise-level emergency management plans, procedures, and planning tools.

Assist University schools, departments, and business units with internal planning. Assess and revise plans following exercises or actual incidents.

- University Emergency Operations Plan (EOP)
Develop and maintain the master EOP, which serves as the enterprise-level conceptual and policy framework for emergency management in the University, including key concepts and organization. Publish or revise the EOP every five years.
- EOP Functional Annexes
Develop annexes to the EOP that provide detailed guidance on managing response and recovery operations in relation to critical functions (e.g., Disaster Medical/Behavioral Health Response and Large-Scale Evacuation).
- EOP Hazard-Specific Annexes
Develop annexes to the EOP that provide detailed guidance on managing response and recovery operations in relation to key hazards and threats (e.g., Active Threat, Power Outage, Pandemic, and Cyber Incident Consequence Management).
- Supporting Response Plans
Lead or support the development of plans and procedures that support selected University-wide emergency management functions and/or organizations. Examples include Degraded Air Quality Response Plan, labor action continuity procedures, and emergency procurement/logistics processes. Develop just-in-time response plans for novel hazards/threats. Support the review of partner plans (e.g., Stanford Health Care).
- School/Operating Unit Emergency Coordination Plan (ECP) Template
Maintain and assist in implementing a customizable emergency plan template for schools/units.
- Action Plans
Encourage and promote the use of formal action plans in training, exercises, and actual events to manage response and recovery activities at all levels.
- Regional Response Plans
Participate in developing Palo Alto, Santa Clara County, San Mateo County, and San Francisco Bay Area regional emergency response plans (e.g. Super Bowl LX).

- Building Occupant Emergency Action Plan (BOEAP)

Develop and maintain the procedures, template, and guidance for schools, departments, and business units to use when developing Emergency Action Plans for specific facilities.

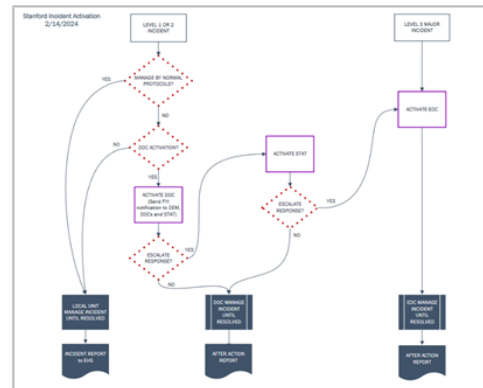

Not in scope:

- *Inventory or evaluations of school or business unit emergency management plans*
- *Inventory or evaluations of individual Building Occupant Emergency Actions Plans (BOEAPs)*

Element Three: Direction, Control, and Coordination

Develop and maintain the capability for University leadership to direct, control, and coordinate University-wide response and recovery operations.

Develop and maintain 1) ability to make swift and informed decisions during emergencies, 2) capability to evaluate evolving circumstances in real time to inform response strategies, 3) proficiency in conveying concise instructions and rationale for actions, and 4) capacity to adapt plans and reallocate resources as needed.

- University Emergency Management Organization
Develop and maintain the core emergency management policies, concepts, organizations, and reporting relationships that support the University's response to minor and major potential/actual emergencies or disasters. Define roles, responsibilities, and authorities of emergency management elements, including the Situation Triage & Assessment Team (STAT), Department Operations Centers (DOCs), Emergency Operations Center (EOC), and the EOC Policy Group.
- Situation Triage & Assessment Team (STAT)
The STAT consists of designated school and business unit leaders who are prepared to convene quickly in the event of an emergency. The STAT's purpose is to rapidly assess the situation, identify potential impacts, and determine the appropriate level of response, including activation of University emergency management organization elements such as DOCs or the EOC. Facilitate bi-annual business meetings and quarterly communications drills. Administer STAT membership and orient new members.
- Department Operations Center (DOC) Coordinators
Department Operations Centers (DOCs) are distributed across the University in schools and business units and serve to focus the school/business unit's internal response efforts as well as serve as the interface between the campus community and the University's EOC. Support and encourage local unit emergency response capability, continuity planning, and recovery planning by the designation of Department Operations Center (DOC) Coordinators. Provide university guidelines for planning, training, and response exercises. Facilitate quarterly meetings/workshops of DOC Coordinators.
- University Strategic Operations Coordination
Coordinate emergency management projects and programs with key University organizations and functions that may support significant enterprise-level risk or potential mission continuity efforts, including Stanford Health Center (SHC), Stanford Research Park (SRP), Stanford Redwood City Campus (SRWC), Stanford Linear Accelerator Center (SLAC), Hopkins Marine Station, and Stanford Global. Serve on coordinating bodies, including the Public Health Steering Committee and Commencement Planning Team.

- University/Local Government Coordination
Coordinate planning, training, exercise projects and programs as well as incident response integration in partnership with emergency management organizations in the City of Palo Alto, City of Menlo Park, Santa Clara County, and San Mateo County.
- Mutual Aid
Assess the capabilities and challenges of potential participation in the National Intercollegiate Mutual Aid Agreement (NIMAA). Identify and develop other potential resources that could augment the emergency management function in a major or extended emergency (e.g., sister university EM program). Potentially Integrate these resources into University emergency plans and organizations.
- University and Collegiate emergency management affiliations
Represent Stanford University and participate in regional and national university and collegiate emergency management associations, including Ivy+ Emergency Managers, Disaster Resistant Universities (DRU) Network, the University and Colleges Caucus (UCC) of the International Association of Emergency Managers (IAEM), and the NCAA Atlantic Coastal Conference (ACC) Emergency Managers Forum.

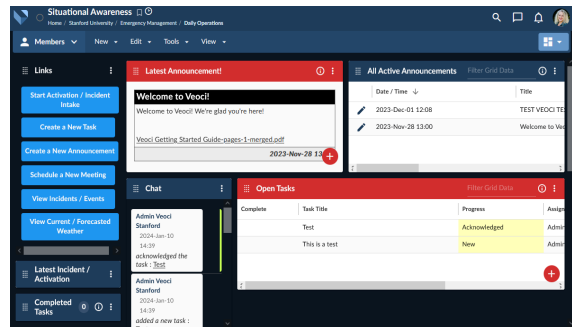

Not in scope:

- *Contingency planning or management of major Special Events (e.g., Commencement) (Office of Special Events & Protocol)*
- *Contingency planning for on-campus programs involving minors (University Human Resources)*

Element Four: Incident Management

Monitor and respond to potential or actual major emergencies and disasters. Engage and lead/support the University's emergency management organization during initial response and ongoing recovery efforts.

Develop and coordinate policies, operational plans, tools, and procedures for large emergency/disaster response and recovery functions including the University's Emergency Operations Center (EOC) and the CardinalShield platform.

- CardinalShield
CardinalShield Incident Management (IM) provides a common operating picture information and resource management tool across university Schools, departments, and business units during incident response. Develop, configure, and operationalize the CardinalShield enterprise software system for incident management and mission continuity planning. Serve as the university's Business Owner for the platform.
- University Emergency Operations Center (EOC) Operations Handbook
Maintain the procedures to be used in activating and operating the University EOC. Subjects include organization, function, activation checklist, staffing, position-specific duty descriptions, functional checklists, and EOC forms.
- Supporting Response Plans and Procedures
Lead or support the development of plans and procedures that support University school/unit internal functions and/or organizations. Examples include Situation Triage Assessment Team (STAT) protocols, Special Event contingency procedures, and the Global Risk Response Plan.
- University Alternate Emergency Operations Center (EOC) Operations Handbook
As above, but addressing the alternate EOC facility.

Not in Scope:

- Incident Executive Authority
- OEM 24/7 Duty Officer
- Incident field response by OEM staff

Element Five: Mission Continuity*

Identify the impacts of potential disruptions and support the development of viable contingency plans and strategies for continuation of mission critical services and recovery.

- CardinalShield
Develop, configure, and operationalize the CardinalShield enterprise software system for incident management and mission continuity planning. Serve as the university's Business Owner for the platform. CardinalShield Mission Continuity (MC) provides a means of aggregating information and data to support emergency operations, continuity of operations, and hazard mitigation planning.
- Mission Continuity Planning Resources
Although not serving as the University's lead agency in this function, OEM supports information sharing, coordination, and collaboration among different university departments and stakeholders. Enable institutional leadership to prioritize continuity efforts effectively by fostering strategic alignment around organizational resilience. Additionally, facilitate dialogue, encourage partnerships, and promote a culture of continuity awareness and preparedness across the university.
- University Strategic Operations Coordination
Coordinate emergency management projects and programs with key University organizations and functions that may have significant mission continuity effects. Serve on coordinating bodies, including the Infrastructure Resiliency Advisory Committee and the Research Continuity Working Group,

Not in scope:

- *University-wide Mission Continuity Program or Plan*
- *Mission Continuity assessments, technical advice, or process coaching*
- *Mission Continuity training or exercises*
- *Vital Records inventory or guidance*

**Note: Stanford University uses the term "mission continuity" rather than "business continuity" to more accurately reflect the scope of the University's academic and research operations as well as its business units.*

Element Six: Communications and Public Information

Support the development of reliable communications capabilities to alert University leadership and emergency response personnel, warn the University community, and effectively manage the response to an actual or potential emergency or disaster.

Disseminate and respond to requests for information before, during, and after major incidents. Develop, implement, and coordinate community preparedness education programs.

- AlertSU
Managed by the Department of Public Safety (DPS), the Everbridge-AlertSU system can rapidly deliver emergency public information to individuals that have provided emergency contact information to the university. Coordinate fiscal and program management operations with DPS and messaging content with University Communications (UComm). As needed, activate the AlertSU system to alert the STAT team and DOC Coordinators.
- Wireless Priority System (WPS)/Government Emergency Telecommunications System (GETS)
Support UIT in providing guidance to schools/units regarding participation in the federal government's telephone (GETS) and cellular telephone (WPS) systems for designated leaders. Enroll individuals as provided by schools/units.
- DOC Net Radio
Managed by the Department of Public Safety (DPS), the EOC Net Radio land-mobile voice radio system allows DOC Coordinators to communicate with each other and the EOC if primary wireless or wireline systems are unavailable. Coordinate and encourage schools/unit DOCs to access the systems and participate in monthly drills.
- Slack
Manage administration and use of channels within the Slack communications application for DOC Coordinators, STAT, EOC staff, and CardinalReady.
- Satellite Communications Systems
Partner with UIT and UComm to coordinate and maximize the potential for using satellite voice and data systems by University schools, departments, and programs for emergency management and mission continuity. Revise and publish the Satellite Phone Directory as needed.
- CardinalReady Website
Develop and maintain an accessible website that allows users to access personal disaster preparedness information and resources for all hazards. Maintain dedicated and secure resources for STAT and DOC Coordinators. Partner with UComm to maintain the ability to post emergency information during actual incidents.

- OEM Business Webpages
Manage content for the OEM portion of the EH&S website, including University emergency management plans, forms, training & exercise materials, and records.
- Voice and Data Communications systems
Identify, assess, and integrate current and potential voice and data systems that support communications for and among University organizations and emergency management elements such as Slack, video conferencing systems, and satellite data wi-fi. Maintain OEM and EOC data systems, including Workgroup Manager, Smartsheets, and Google Drive.
- OEM Field Equipment
Manage and maintain OEM communications systems and equipment, including satellite voice/data, amateur-band radio, and DOC Net radio.
- Threat/Hazard-Specific Preparedness Campaigns
Organize and coordinate focused public education campaigns to enhance personal and community preparedness. Campaigns include Earthquake Preparedness Month, Winter Storm Preparedness Week, and FireSafe Santa Clara campaigns.
- Emergency Management Resource Library
Maintain and distribute various emergency management references, including preparedness guides, training materials, and technical documents. Make materials available to University students, faculty, and staff.
- CardinalReady Wallet Card
Develop, update, and maintain the CardinalReady emergency information wallet card for distribution to students, faculty, and staff.
- Community and Organizational Presentations
As resources permit, provide dynamic presentations to university students, faculty, and staff on emergency management subjects, including individual and organizational disaster preparedness, threat-specific briefings, and the university's emergency management systems.

Element Seven: Education, Training, and Exercises

Assess, develop, and implement targeted training and educational programs for the University community, strategic functions, and emergency management organizations.

Assess and evaluate emergency response plans and capabilities through regularly scheduled workshops, drills, and exercises. Take corrective steps as necessary.

- OEM Emergency Management Training and Exercise Program
Develop, coordinate, and conduct training for university community members participating in University emergency management functions, including the Situation Triage Assessment Team (STAT), the University EOC, Department Operations Centers (DOCs), CERT, and building occupant safety teams. Provide training resources for individual preparedness for students, staff, and faculty - provide in-person instruction as resources permit. Administer courses in STARS.
- Community Emergency Response Teams (CERT)
Facilitate delivery of CERT training to students in partnership with the School of Medicine via the EMED-101 course with at least two offerings annually. Support the formation and training of CERT teams throughout the University. Support the development of a standardized set of reference and training materials. Maintain a standardized CERT reference manual. Integrate CERT teams into University emergency planning and response efforts as possible.
- Senior University Leadership
Serve as the proponent agency for developing and delivering emergency management training and exercise support to senior leadership.
- Training resources and library
Develop and administer a comprehensive collection of materials to support preparedness training, including references, audio-visual aids, course outlines, instructor guides, and student handouts. Develop materials as necessary and make them available to emergency managers, University faculty, and staff. Maintain the DOC Coordinator toolkit on CardinalReady. Coordinate the University's participation in local and regional homeland security training programs.
- Exercise Design/Support
Coordinate, facilitate, and/or support the design and performance of exercises by University agencies by conducting training and coaching for exercise design teams. Design and conduct exercises on behalf of schools and units as resources permit. Support may also include participant coordination, serving as simulators, or evaluating performance.

- University table-top, functional, and full-scale exercises
Coordinate and conduct a periodic University functional exercise using various threat scenarios. Coordinate and conduct a full-scale exercise every four years using various threat scenarios. Utilize Exercise Design teams to develop the exercise plan. Ensure the full participation of all University organizations and allied agencies that play a role in emergency response and recovery.
- State and Regional table-top, functional, and full-scale exercises
Assist in developing and participating in state-wide and regional tabletop, functional, and full-scale exercises, including Golden Guardian, Statewide Medical Health Exercise, and UASI programs. Coordinate University participation in these events.
- After-Action Reviews and Reports
Encourage and potentially lead after-action reviews (AARs) immediately following any exercise or actual emergency to capture participant feedback and lessons learned. Following major events, encourage the publication of after-action reports and corrective action plans.
- Plan revisions
Revise plans, procedures, and policies as needed depending upon input received through after-action reviews, after-action reports, de-briefs, and informal comments. Exercise revised plans and obtain approval from appropriate authorities. Coordinate revisions of plans that affect more than one jurisdiction or discipline.

Not in Scope:

- *AED/CPR/First Aid training not part of EMED-101 (EH&S OSH)*
- *Emergency training or exercise standards for University schools and units*
- *BOEAP training or exercises*

Element Eight: Logistics, Facilities, and Resource Management

Identify, locate, acquire, distribute, and account for services, resources, materials, and facilities that support emergency management. Develop procedures for the prompt and effective identification, acquisition, distribution, accounting, and use of personnel and major equipment items for essential emergency functions.

- Emergency Operations Center (EOC)
Manage the University EOC facility, including administration, maintenance, training, and recurring validation activities. Inventory, test, and maintain associated communications systems, IT, supplies, and equipment. In a major emergency, the EOC serves as the University's central coordination point for gathering information, establishing response priorities, allocating resources, and communicating with the university community. While immediate response efforts are led by public safety agencies on the ground, the EOC is organized to back those efforts as well as quickly empower the University to provide additional emergency support services, including care & shelter, health, transportation, communications, and mission continuity. Opened in 2024, the dedicated primary facility is located at 253 Bonair Siding Road.
- University Emergency Operations Center (EOC) staff
Maintain a comprehensive EOC staffing program with at least three individuals identified, trained, and prepared to assume each EOC staff position. Coordinate with University leadership to develop support for EOC staff training and exercise.
- Alternate Emergency Operations Center (Alternate EOC)
Maintain an alternate or backup facility that can immediately and fully support EOC operations if the primary EOC is damaged or unavailable. The Stanford University Alternate EOC is located at EH&S at 484 Oak Road.
- OEM administration offices
Maintain the OEM offices to support staff efforts, including administration, logistics, communications, and pre-incident threat monitoring.
- OEM Staff Equipment and Supplies
Develop and maintain equipment and supplies sufficient to allow OEM staff and programs to operate independently for a minimum of 72 hours.
- University Emergency Equipment and Supplies
Coordinate and advise schools and units in the storage of emergency equipment and supplies. Participate in the development of the University's proposed Emergency Supplies Warehouse (ESW). Lead university stakeholder coordination and facility management.

- OEM Personal Protective Equipment (PPE) Cache
Maintain the university's strategic cache of PPE material (e.g. N95 respirator masks). Request annual Capital Project funds to purchase and replace expired items. Maintain inventory and distribution procedures.
- Contingency resource contracts
Advocate for and assist in developing vendor contracts that can support selected emergency response and recovery operations, including essential equipment, supplies, and services (e.g. Call center).Personal Protective Equipment (PPE) Cache
- Emergency Operations Center (EOC) emergency credit cards
Maintain and secure the high-limit credit cards (PCards) issued to selected University staff for use during a major emergency or disaster..

Not in Scope:

- *Contingency resource contracts for core services/resources (e.g. fuel, potable water, food)*

Element Nine: Program Management, Improvement, & Governance

Develop fiscal and administrative procedures to support emergency measures before, during, and after emergencies or disasters.

- OEM personnel
Recruit, develop, and retain an empowered and equitable workforce that forms the core of the OEM program. Administer recruiting, work assignments, work schedules, and professional development.
- OEM budget
Develop and manage the EH&S budget necessary to sustain OEM programs and staff. Address incident-driven and/or one-time budget adjustments as needed. Address relevant Capital Project budget items (e.g. Personal Protective Equipment (PPE) Cache)
- OEM Program Work Plan
Develop, publish, and revise the annual OEM work plan in alignment with EH&S annual Objectives & Key Results (OKR) process. Incorporate input from University leadership and corrective actions from recent incidents and exercises.
- OEM Staff Development Program
Develop OEM staff capabilities via participation in training opportunities, rotating assignments, and gaining experience at planned events and emergency incidents as possible.
- OEM emergency contacts database and workgroups
Develop and maintain a database of all key external emergency response agencies and personnel, including local, county, state, and federal agencies. Prepare rosters in support of various programs such as DOC Coordinators, STAT, and EOC staff activation.
- Professional emergency management affiliations
Participate as members and leaders in professional associations that support professional development, coordination, networking, and accreditations, including the International Association of Emergency Managers (IAEM) and the California Emergency Services Association (CESA).
- University emergency-related personnel policies and procedures
Support the development of Stanford University policies that direct the use or protection of students, faculty and staff in a major emergency or disaster (e.g. Employees with Essential Roles policy).

- FEMA Public Assistance (PA) program
Following a large, presidential declared disaster, serve as the coordinating point for University agencies seeking to apply for reimbursement of response related costs.
- Stanford Administrative Guide
Review and advise on policies and language in the Stanford University Administrative Guide related to emergency management and mission continuity.
- University-wide Emergency Management Strategy
Lead efforts to develop university-wide assessment and prioritization of emergency management projects and related efforts.
